VERTICAL SPREAD TRADER

Leveraging The Power Of Options

Issue #722 March 20, 2024 - By Lee Lowell

Profit Time!

Hello Vertical Spread Traders,

Housekeeping note:

We have members join (and sometimes leave) our service at various times during the year. We offer both monthly and annual plans, with Paypal as our payment processor.

Renewals of both plans happen automatically, as you are charged based on your monthly or annual date.

Please, please, PLEASE be aware of your recurring payment date, as there are no advance notices that are sent to remind you that a charge is forthcoming.

If you wish to leave our service and want to avoid unnecessary processing fee charges, please let us and/or Paypal know (if you have a Paypal account) ahead of your renewal date. This saves all of us hassles, headaches, and extra charges. If you notify us after the renewal date, fees will be incurred.

These instructions can also be seen on the newsletter sign-up page on our website.

Thank you!

Today is Fed Day.

What's that?

Well, the U.S. Federal Reserve will be announcing its current decision on interest rate policy at 2pm EDT.

It's typically a big deal, and can have a big effect on the stock market.

But most analysts believe the Fed will keep interest rates as-is, as they're still waiting for a bit more improvement on the inflation front. The Fed's biggest tool to fight inflation is to raise interest rates, which they've done over the last two years or so, but have kept them at the same level for their last few meetings.

So today's decision shouldn't cause too much of a market reaction unless chairman Powell offers some unforeseen surprises at his 2:30PM EDT conference call.

Regardless, we're going to take profits on one of our put-sell positions to lock in the gains.

Triple Q's (QQQ)

We have two QQQ positions on right now, and I want to close out the near-term one.

Here's what you can choose to do (official):

Note: you will only execute this buy-back trade if you already hold the credit spread position in your account. If you don't have the position, you can disregard these instructions.

Buy back (buy-to-close) all of your QQQ April 19, 2024 \$380/\$375 (\$5-wide) put option credit spreads for a limit debit buy price of \$.06 per spread or cheaper, GTC, as a closing transaction (buy-to-close).

Currently, the spread has a market of \$.05 bid/\$.07 offer, so let's see if we can get it done right in the middle at our limit price of \$.06 per.

If you don't get filled today, just keep your order working "GTC".

Here are more detailed instructions, which will sound very much like the ones I give when we open the spread.

In the trade instructions above, I will always place the higher (more expensive) strike first, as it is the one we will be **buying** as part of the spread buy-back. The lower (less expensive) strike listed is the one we will be **selling** in the spread.

In this buy-back trade, you will be **buying** the \$380 put option and **selling** the \$375 put option all within a single transaction. This is the exact reverse of how we initially open the spread.

Do not pay more than \$.06 per spread.

It is in your best interests to execute the trade as a single spread transaction instead of executing two separate distinct buy & sell trades.

If you don't understand what that means, please read the Primer for more details. You can also ask your broker for help if you need it.

When executing the trade as a single spread transaction, it doesn't matter what each "leg" trades for. All that matters is that you buy it for no more than \$.06 per spread, or lower.

If for whatever reason you cannot, or don't want to enter the trade as a single spread transaction, you are more than welcome to execute two trades independently of each other. This will entail you having to set up your trading platform to buy the \$380 put option first, and then manually get your trading platform set up a second time to sell the \$375 put option. This is called "legging it".

It takes up precious time and is tedious to do it that way. You also open yourself up to "slippage", which means the stock can jump or fall in price on you unexpectedly while you fumble with your trading platform to get set up to make those individual transactions.

Trust me, please try to learn how to execute these trades as spreads. It will make things a lot easier.

But if you do need to "leg it", you can try to buy the \$380 puts for around \$.41 per contract and then immediately sell the \$375 puts for \$.35 contract. That would

make the spread no more than \$.06 maximum. The prices could be different than this by the time you place your order.

Do not pay more than \$.06 per spread, either outright or by legging it.

Ok, that's all for now. Get those buy-back orders in there and let us know how you do.

Continue to hold all other open positions as-is.

Contact us [here](#) with fills, comments, questions or concerns.

Best,
Lee

Current Portfolio

Continue to work all trades as instructed and continue to hold all other open positions as-is.

See the Current Portfolio below for current prices & instructions.

Note on the Current Portfolio - if you are a new subscriber and don't have a position yet on any of our trades, make sure you enter your order at the original recommended prices. If you are unsure or have any questions, please ask us!
