VERTICAL SPREAD TRADER

Leveraging The Power Of Options

Issue #705, January 23, 2024 - By Lee Lowell

Profit Results - Adobe, Inc. (ADBE)

Hello Vertical Spread Traders,

We had no problem getting filled on the ADBE buy-back trade from yesterday.

Fills came in at \$.04 & \$.05 per spread, so we'll take the official mark at \$.05 per.

Here's what we did (official):

Bought back (bought-to-close) all of the ADBE February 16, 2024 \$485/\$480 (\$5-wide) put option credit spreads for an official debit buy price of \$.05 per spread as a closing transaction (bought-to-close).

Currently, the spread is still trading between \$.04 to \$.05 per, so if you haven't placed your order yet, you can still get filled at good prices.

Do not pay more than \$.05 per spread.

Here are the profit details:

We originally established (sold-to-open) this put option spread on December 14, 2023 for a sale price of \$.28 per spread, and now we took gains by buying it back (bought-to-close) for \$.05 per spread.

With the fill at \$.05, it locked in a gain of \$.23 per spread (\$23 for every spread traded) and a return on margin (ROM) of 4.8% ($\$23/\472) in about five and a half week's time. If you like to annualize, the return is roughly 45%.

How do we get the \$472 margin requirement number?

It's the width of the spread (\$5.00) minus the initial credit received (\$.28) multiplied by 100.

$$(\$5.00 - \$.28) \times 100 = \$472.$$

We always look to close our trades when we hit the "80% Rule" threshold, typically before the expiration date.

In this case, we captured 82% of the full profit potential ($\$23 \text{ profit}/\$28 \text{ full potential} = 82\%$).

The full profit potential is always what you received for the initial credit. In this case, it was \$28.

Locking in early wins is just smart money management and it allows us to free up

cash to put towards new trades.

Congratulations to those of you who participated in this trade.

Ok, that's all for now.

Continue to hold all other open positions as-is.

Contact us [here](#) with fills, comments, questions or concerns.

Best,
Lee

Current Portfolio

Continue to work all trades as instructed and continue to hold all other open positions as-is.

See the Current Portfolio below for current prices & instructions.

Note on the Current Portfolio - if you are a new subscriber and don't have a position yet on any of our trades, make sure you enter your order at the original recommended prices. If you are unsure or have any questions, please ask us!
